This Limited Warranty defines specific legal rights. You may have other legal rights which vary from state to state. Some states do not allow the exclusion or limitation of incidental or consequential damages.

Installation

- Whips are mounted by drilling 1/2" hole into bumper or other secure location. Then whip base is placed into hole and secured by supplied nut and lock washer.

Wiring of Whip

- To power the whip requires two wires on the yellow male RCA cable supplied to be connected to power and ground through a switched power source. See below for details.
- Wiring Connections
 - Red Wire: Is connected through a recommended 1 amp fuse (not supplied) to a positive DC switched battery source. For example a switched power source would be the running lights on a vehicle.
 - Black Wire: This wire is connected directly to chassis ground.
